25X1 3. [ ] I talked with Mr. Burris, in the Bureau of the Budget, concerning the request we had received from the Constitutional Rights Subcommittee for a report on three Senate bills on wire tapping and eavesdropping. Burris said that the Department of Justice has not drawn up its proposed report as yet and that at present there are no indications as to policy on these bills. I told Burris that we would be in touch with Justice on this and then would discuss our proposed report with him.

25X1

25X1 5. [ ] [ ] called to say that CI Staff has prepared a first draft of a presentation on Soviet forged documents. This draft is now in the hands of Mr. Helms and should be ready for a presentation before the Senate Internal Security Subcommittee in about two weeks if no substantial changes are made in this first draft.

25X1

25X1 6. [ ] Suggested to Dr. Charles Sheldon, Assistant Staff Director of House Science and Astronautics Committee, that the information provided to the Committee concerning Soviet man in space was still classified even though there might have been some compromise of the information in the newspapers and that we would like to request the Chairman's consideration in bringing this matter to the attention of the full Committee. Dr. Sheldon advised later in the day that the Committee had been in executive session at the time of my call and he brought this matter to the attention of the Chairman and that the Chairman made an announcement to the full Committee suggesting that no comment whatsoever be made to newsmen in regard to this matter.
